Modular injection moulding machines

The ARBURG Allrounder range delivers all round precision and efficiency

ARBURG is a leading global manufacturer of injection moulding machines and sets the standard for precision and speed. That's why Comtec partners with Arburg Allrounder injection moulding machines exclusively, along with our turnkey systems and the Freeformer, which gives you individually adapted solutions. The energy efficient German technology makes it the perfect fit for Comtec.

Inject our expertise and experience into your business

It doesn't matter which industry you operate in or which plastic parts you need manufactured, the ARBURG / Comtec partnership will deliver outstanding results. Comtec works hand-in-hand with ARBURG, so when you partner with Comtec, you're combining our expertise with ARBURG'S peerless machinery and decades of experience. This combination gives you a valuable competitive edge.

While ARBURG supplies the world-class equipment, Comtec adds value through:

- ARBURG factory-trained service technicians
- OEM service tools and spare parts
- turnkey systems with Comtec robotics and ancillary equipment
- In-house design and engineering
- factory data management (industry 4.0)

ARBURG'S modular injection moulding technologies includes:

- hydraulic
- hybrid
- electrical
- vertical injection moulding technology

Whatever your business, we'll individually tailor an effective solution for your needs. We are highly experienced in the following categories:

Beverage and food packaging

Automotive

Electronics

Medical device and packaging

Optics

Technical

Additive manufacturing
